Exclusive designs

All chocolate lollipops and figures are unique since they are all designed in-house, given a personal **Name** and protected by copyright.

All figures are authentic work. The development of a new figure begins minimum 1,5 year before introduction on the market. We start from **sketches** and **designs**. The sketches are adjusted until we have the perfect figure.

After general approval of the sketches, a first model is made out of **plaster**. Different plaster moulds and handmade chocolate samples are made.

Every figure has to show the passion, happiness and love with which it is made. In short: it has to **Make People happy!**

eye for detail

Only then the figure receives our quality seal. It's a guarantee that all decorations are always identical and very precise.

Premium Belgian chocolate made in Belgium

That beautiful gloss, the distinctive sound when you break it, the way it melts in your mouth... Producing a ~~divinely delicious piece~~ of chocolate which maintains every treasured quality throughout its shelf life isn't easy. It requires real Belgian craftsmanship! Our secret Belgian chocolate recipe comprises only the finest ingredients, such as top quality Madagascar cocoa beans, 100% pure cocoa butter, whole milk powder, soy lecithin and a dash of natural vanilla from Madagascar. We are very proud that all our chocolate figurines are still made in Belgium.

Unique Chocolate recipe

For all our figures and lollipops we use a unique chocolate recipe based on a strict selection of ~~Madagascar~~ Madagascar cocoa beans. This bean gives a light red, warm colour to our chocolate, which ~~determines the individual character~~ determines the individual character of our products, and enriches our chocolate with a **unique** and **strong** flavour.

Highest Quality standards

Attention to every detail ensures our top quality Belgian chocolate satisfies in every way. The harmony between modern technology and experienced craftsmanship guarantees a permanent level of high quality throughout the manufacturing process while meeting HACCP- and BRC standards.
