

# Score with health supplements

People always want to be the best they can be – in health, sports and fitness. At Aminolabs we want exactly the same for you and your clients. We understand that **a dynamic market requires freshly designed concepts** and that these change the demand for your health supplements. Get one step ahead with Aminolabs!

## We support your success

We make it our business to know all about the trends that keep you in shape. Because of our tailored concept we can react better than anybody else to cover new needs in the market. Let us be your **strategic partner** in health supplements, to support your success.

## In-house development & production

At Aminolabs we not only have our own production, we also have an **innovation centre with research facilities** to conduct continuous studies. New solutions for concepts, products and production are invented in close cooperation with customers, research institutes and university centres. This way, sparks of brilliance are developed into real life **products of the highest quality**.

## The Aminolabs mentality

You can only stay ahead of the game if you have a great team behind you. At Aminolabs we combine the talent, knowledge and experience of our more than 160 **passionate professionals**. This is the solid base on which we have built the open and stimulating culture of Aminolabs. Internal and external **collaboration, dialogue and innovation** deliver groundbreaking concepts, along with products that quickly become popular in the market.

## About Aminolabs

Aminolabs is the preferred supplier of many internationally renowned companies in **health and sports supplements**.

Our combination of innovative concepts and a flexible yet **high-quality production** is convincing. Consumers around the world enjoy the products that are developed and produced at our facilities in Hasselt, Belgium.

### World-class quality

Everything we do is accomplished with thorough attention to quality, safety and hygiene. Guaranteed by our **ISO 22000 certification** and continuation of the latest **HACCP standards**. The international quality label 'Informed Choice' ensures that all our ingredients and supplements are 100% free of banned substances. And, because our dietary supplements are produced according to **GMP standards**, we can offer a unique approach in our industry.

### From ingredient to finished product

With our integrated product range, and by seeing you through the entire process, Aminolabs can respond to virtually any requirement surrounding new concepts. Our complete production is aimed at **efficiency and flexibility**. We create large batches as well as short runs in **various forms** - such as tablets, capsules, powders, emulsions and liquids - and include labelling and **every type of packaging**.
