Ingredients for ice cream

The perfect base for scoop ice and soft ice!

Colac ice cream powders and improvers are the perfect base for your scoop ice, soft ice and frozen yoghurt.

The ready-to-use ice cream bases give you the opportunity to make an excellent ice cream.

Do you wish a more creamy ice cream? We recommend you the Colac ice cream paste, an exclusive improver to be added to the base. Colac ice cream paste contains 22% of butterfat, giving the ice cream that delicate texture you are looking for and a more full bodied, creamy flavour.

The ice cream smoothener Softa makes the ice cream better scoopable.

With the wide range of improvers, stabilisers and emulsifiers, you can make your own unique ice cream base. Colac gives you the technical support for the development of all your ice cream products. Also your custom-made ice cream base can be produced.

Ready-to-use base

Vanilla ice cream

1.8 kg Ice cream base vanilla
0.6 kg Colac ice cream paste
6 l Whole milk
or 5 l Water

Stir the base with the milk.
Add the Colac ice cream paste.
Then: pasteurize, cool and freeze.

Vanilla Special

5 l Whole milk
0.6 kg Sugar
0.35 kg Dextrose
0.3 kg Improver special
0.015 kg Stabiglace

Mix the powders with the sugar.
Stir the milk and the powders until you have a homogeneous mass. Add the Colac ice cream paste to the mix. Then: pasteurize, cool and freeze.

Frozen Yoghurt

1 kg Base Yoggi Frys
2 kg Plain Yoghurt
2 l Whole milk

Stir the base with the whole milk. Add the yoghurt to the mixture and freeze.
